Acta Scientiarum Mathematicarum
Volume 61, Numbers 1-4, 1995

Author index

M. E. Adams, M. Gould, Endomorphism monoids of pseudocomplemented semilattices 3–21

E. A. Azoff, M. Ptak, Jointly quasinormal families are reflexive 545–547

F. Beckhoff, Approximate identities and the Arens product 383–398

R. Berntzen, Spectral approximation of normal operators 493–510

S. Bogdanović, T. Petković, M. Ćirić, Rings satisfying some semigroup identities 123–137

J. Bognár, Signature of the orthogonal companion in Kreĭn spaces ... 367–371

I. Chajda, G. Czédli, I. G. Rosenberg, On lattices whose ideals are all tolerance kernels 23–32

M. Ćirić, S. Bogdanović, T. Petković, Rings satisfying some semigroup identities 123–137

G. Czédli, I. G. Rosenberg, I. Chajda, On lattices whose ideals are all tolerance kernels 23–32

M. Davidson, G. Grätzer, A note on coalitions 33–34

S. S. Dragomir, C. E. M. Pearce, J. Pečarić, On Jessen's and related inequalities for isotonic sublinear functionals 373–382

K. Driver, H. Stahl, Simultaneous rational approximants to Nikishin Systems. II 261–284

Á. Elbert, On-off damping of linear oscillators 209–224

A. Fearnley, A strongly rigid binary relation 35–41

C. Foias, A. E. Frazho, Constructing the Schur Contraction in the Commutant Lifting Theorem 425–442

Y. Fong, K. Kaarli, Unary polynomials on a class of groups 139–154

A. E. Frazho, C. Foias, Constructing the Schur Contraction in the Commutant Lifting Theorem 425–442

D. V. Giang, F. Móricz, On the L^1 theory of Fourier transforms and multipliers 293–304

D. V. GIANG, F. MÓRICZ, The Cesàro operator is bounded on the Hardy space H^1 535–544

M. GOULD, M. E. ADAMS, Endomorphism monoids of pseudocomplemented semilattices 3–21

G. GRÄTZER, M. DAVIDSON, A note on coalitions 33–34

P. A. GRILLET, Partially free commutative semigroups 155–169

M. HORVÁTH, Eigenfunction expansions for one-dimensional Dirac operators 225–240

T. IMAOKA, Representations of generalized inverse $*$-semigroups 171–180

K.-H. INDLEKOFER, E. MANSTAVIČIUS, Translates of additive and multiplicative functions defined on arithmetical semigroups 105–122

K. KAARLI, Y. FONG, Unary polynomials on a class of groups 139–154

Z. KÁNNAI, P. TALLOS, Stability of solution sets of differential inclusions 197–207

K. A. KEARNES, Minimal clones with abelian representations 59–76

L. KÉRCHY, Injection of unilateral shifts into contractions with nonvanishing unitary asymptotes 443–476

S. V. KONYAGIN, On divergence of trigonometric Fourier series over cubes 305–329

R. LASSER, J. OBERMAIER, On the convergence of weighted Fourier expansions with respect to orthogonal polynomials 345–355

E. MALKOWSKY, The continuous duals of the spaces $c_0(\Lambda)$ and $c(\Lambda)$ for exponentially bounded sequences Λ 241–250

E. MANSTAVIČIUS, K.-H. INDLEKOFER, Translates of additive and multiplicative functions defined on arithmetical semigroups 105–122

T. MATSUMOTO, Compact weighted composition operators on the domain of a closed $*$-derivation in $C(K)$ 511–521

L. MOLNÁR, B. ZALAR, On automatic surjectivity of Jordan homomorphisms 413–424

F. MÓRICZ, D. V. GIANG, On the L^1 theory of Fourier transforms and multipliers 293–304

F. MÓRICZ, D. V. GIANG, The Cesàro operator is bounded on the Hardy space H^1 535–544

J. W. NEUBERGER, Prevalence of chaotic differences for unpredictable functions 181–196

J. OBERMAIER, R. LASSER, On the convergence of weighted Fourier expansions with respect to orthogonal polynomials 345–355
